

Reference: https://au.pinterest.com/josh_de/website

theres a inspiration pinterest

and then the aesthetic is vintage cartoon - so fonts like within this image attached

So vintage aesthetic but very modern website structure

I can share with you the details (backgrounds and such) the author of the book just requires an NDA be signed if thats okay with you

He is publishing the book himself but he has worked on it for many years, so anyone involved has to sign one

https://drive.google.com/drive/folders/1qwPJXSf6DN_argzhe5PclmHrFaUf4mon?usp=sharing

Please note you are the only one who has access to this google drive

We will need in depth conversations going forward - there is a rough explanation in the google drive titled 'features' - but doesn't include everything. Please review everything and then lets arrange a time for a call to discuss details to make sure everything is clear to make sure we are all on the same page for the shop - any questions I'm available to answer, please don't assume if unsure.

Then there will be the setting up the B&S dropshipping etc.

Main features of the website

- Parallax scrolling (layers provided in photoshop file - there is also 1 extra layer of two of the characters and an apple, that's been uploaded separately that needs to be included)
- Provided cartoon video embedded into the artwork
- Book Rotating 3d file
- Carousel of coming soon products
- Ideally a space for book reviews to build trust on top of home page
 - would also like the logo to appear (Please use 'Ooga Booga!' from the book as a placeholder for now)

The idea is for the shop to feel like a little world in there - not like a typical website

Any fonts used will need to be on theme with a 1940s-1960s classic animation aesthetic

Style Vintage Cartoon aesthetic + Modern Website effects

Items to be sold:

Main item - Book (Is featured as a 3d rotating file) (available in hardcover and softcover, will need to send you more images from the book and a description)

Coming soon items: displayed in shop-front carousel - 3 t-shirts (I don't have the 3d files for these yet) (Only space to fit 2, so will need to be carousel to skip through options)

Coming soon: Plushie (Just is an image right now in a shop front - will need to be highlighted/ clickable when you hover over it)

Product pages

Want all product page to open on rotating 3d files - and then a photo grid + reviews on real products beneath that

(background for product page could just be super blurred versions of the home page background)

Content:

Mostly all provided

Let me know if you need anything else - there are a couple things like the 3d shirt files that aren't yet ready

Thank you Ameer, I look forward to working with you on this

Budget: 10k Pkr

Timeline: 4-5 days.

Platform: Shopify

Ongoing: More milestones coming soon!

First milestone is development of shopify store.

Task: Custom Theme development
